

Becoming an AI Empowered Organization

Secure a first-mover advantage over the competition via impactful, responsible deployment of AI.

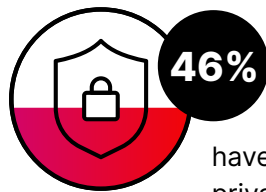

Expectations Run High...

Leaders across the org chart are euphoric in their expectations when it comes to adopting AI.

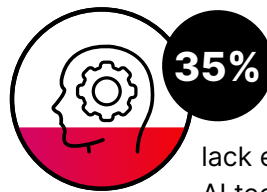

But Rapid Evolution Has Its Own Concerns

Organizational leaders have trepidation when adopting AI:

have security and privacy concerns

lack expertise in AI technologies

have inherent ethical concerns

So Deployment Trails Expectations

Actual deployment is a different story.

Only **8%** of organizations have completed their due diligence and fully implemented AI...

... and many companies have outright banned it [↗](#)

The answers to your most pressing questions are not found on the Internet.

They are found in the systems and the data your company has amassed over years and decades.

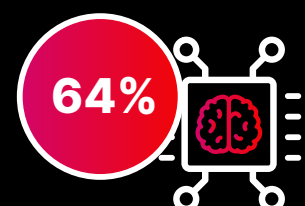

Impactful insights from AI come from your data and AI-enabled infrastructure.

want a non-hyperscale cloud for AI

median spend on AI infrastructure in last 12 months

say it is VERY IMPORTANT that AI infrastructure is integrated with existing infrastructure

Expedient Stands Uniquely

Impactful deployment of AI requires a trusted and proven partner adept at navigating rapid technological shifts.

For over two decades, Expedient has helped clients navigate the fraught and ever-evolving IT and cloud landscape. This gives us a unique perspective into how new technologies impact not just the processes by which an organization runs, but the very DNA it runs on.

AI is a tidal wave of opportunity for organizations, with the potential to dramatically change that DNA once again, if handled correctly.

Expedient delivers the capabilities to unlock the potential of AI across communities.

	Drive Innovation	Accelerate Outcomes	Lower Costs	Reign in Shadow AI	Increase Throughput	Control Data Leakage	Accelerate Tasks	Embrace Innovation	Utilize Modern Tools	Future Proof AI Infrastructure	Access Private Data Securely at Scale	Access Top Industry Models
C-Suite	✓	✓	✓			✓		✓		✓		
IT			✓	✓	✓	✓	✓	✓	✓	✓	✓	
Legal/ Compliance						✓						
Knowledge Worker	✓	✓			✓		✓		✓			
Task Worker		✓			✓		✓					✓

AI offers a unique opportunity to secure a first-mover advantage over competitors.
Expedient is there to navigate the journey.

Take the Next Step

Expectations are high, along with the pressure. We get it. We're here to help.

1 Define an AI use policy inside your business

Balance the need for enriched AI experiences with privacy and proprietary interests

2 Provide an alternative to "Shadow AI"

Safeguard against risks while promoting responsible and aligned AI development

3 Define your AI use cases

Ensure that AI projects are not just technically sound but also closely aligned with business objectives

4 Get your data "AI Ready"

Eliminate incompatible protocols and ensuring optimal storage and accessibility

5 Implement a Secure Private Interference solution

Run the AI interference alongside existing infrastructure with layered foundational models fine tuned on your data
