

Abundant IoT seamlessly integrates Energy and IoT Solutions, what we like to call eIoT, to deliver sustainable revenue-generated ecosystems. Our portfolio spans over the following:

- Electricity
- Natural Gas
- LED
- Solar
- Water
- Generators
- Battery
- Mobility
- Fleet
- IoT-Powered Efficiency Programs

The company also Provide the following consulting services:

- **Smart Building/Smart City.**
- **Environmental, Social, and Governance (ESG) and the Inflation Reduction Act (IRA)**

With Energy as an **\$8T** market and IoT at **\$21T**, the combined upsell potential **exceeds \$10 trillion**. Upselling energy not only creates a power new revenue stream, it also boosts long-term customer retention.

Abundant IoT's mission is to integrate IoT and Energy (=eIoT) technology to **digitally transform** and create new enterprise ecosystems with sustainable solutions.

The company aims to **deliver efficiency and achieve net carbon-neutral emissions**, contributing to the journey towards net zero. Abundant IoT is actively involved in creating and enabling renewable energy opportunities within the IT channel.
