

# Everything You Need to Make AI Work From Rapid Deployment to Long-Term Business Gains

## Expedient AI CTRL Platform

Most businesses are launching an AI pilot or testing public chat tools. The hard part is turning that early momentum into reliable and repeatable business impact without losing control, increasing risk, or asking internal teams to maintain an ever-changing AI stack.

**That's where Expedient is different.** Our approach frees you to leave behind DIY technology and processes and supports your entire AI journey, from early productivity gains to advanced, outcome-driven agentic workflows, on a single, secure platform.

**5%**  
A mere 5% of custom AI tools move to production<sup>1</sup>

B U T . . .

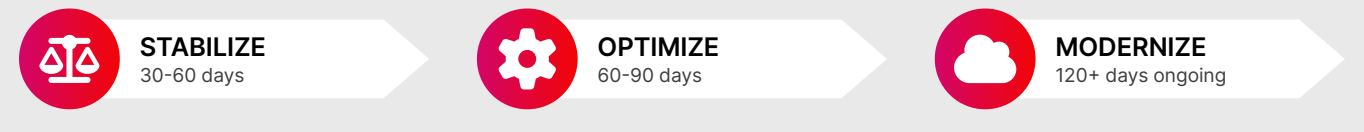

**66%**  
66% of companies achieve AI success when **working with a strategic partner**, versus 33% that DIY<sup>2</sup>

## Your Expedient AI Roadmap

With the AI CTRL Platform, Expedient provides your organization with a clear path forward, enabling you to build an AI roadmap that drives productivity, innovation, and business growth. Beyond the technology, experts from the AI Outcomes team are available to guide your journey, mapping your use cases to the right AI capabilities.

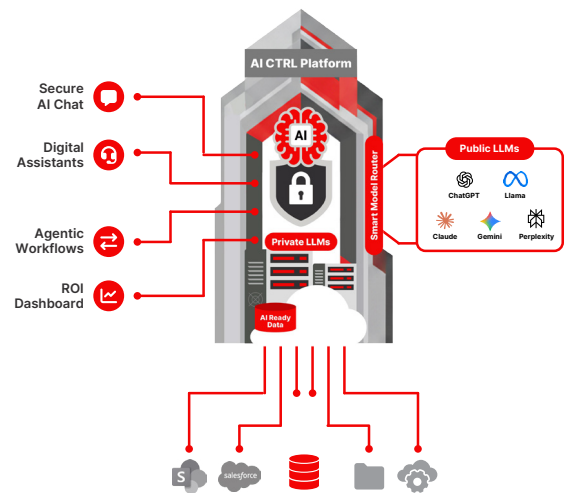

### Work with an AI Expert to Accelerate Your Journey

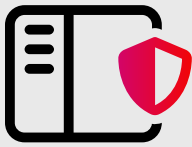

<p><b>Safely grow your AI practice</b></p> <ul style="list-style-type: none"> <li>Stop Shadow AI</li> <li>Resiliency, security, scale</li> <li>Private cloud</li> </ul>	<p><b>Controlled access to secure AI chat</b></p> <ul style="list-style-type: none"> <li>Enhance productivity</li> <li>Usage guardrails</li> <li>AI transparency</li> </ul>	<p><b>Bring context with your data</b></p> <ul style="list-style-type: none"> <li>Stop hallucinations</li> <li>Higher quality</li> <li>Deeper insights</li> </ul>	<p><b>Drive differentiated outcomes</b></p> <ul style="list-style-type: none"> <li>Process automation</li> <li>Agentic workflows</li> <li>Domain solutions</li> </ul>	<p><b>Lay foundation for new use cases</b></p> <ul style="list-style-type: none"> <li>Bespoke AI</li> <li>RAG</li> </ul>

## Expedient AI CTRL Platform

- Integrated, consumption-based AI
- Located on a dedicated container, hosted on a private cloud
- Delivered with built-in governance, security, and identity controls
- Created for teams to scale usage and adopt other services without changing platforms

## Take the First Step with Secure AI Gateway

Secure AI Gateway is a core service of the Expedient AI CTRL Platform and is the foundational security and governance for all other AI that you build. It enables protected, controlled, intelligent access to a variety of public models, empowering increased productivity within days of deployment.

Eliminate shadow AI with controlled, secure access to public models

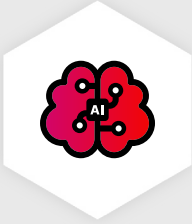

Improve AI response quality, context, and accuracy with enterprise data

Reduce demands on employees and enable self-service access to information and answers

Ensure data privacy and compliance with regulations and corporate policies

## Expand with Agentic Workflow Engine

Turn AI from a helper into a doer. Expedient gives you an agentic onramp that starts with the business goal, then facilitates the models, agents, data, and automation to make it possible. The result is resilient, intelligent AI-powered workflows that tackle specific, high-value tasks.

Go from experimenting with AI to running critical business operations with AI augmentation

Accelerate time to outcomes with prebuilt agentic workflows

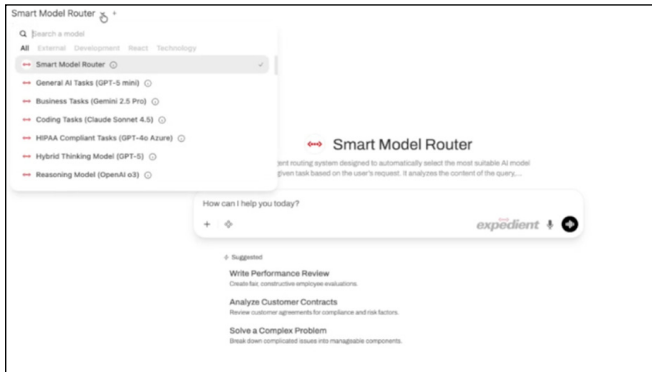

Unlock AI value faster with expert human AI outcomes engineers to guide you

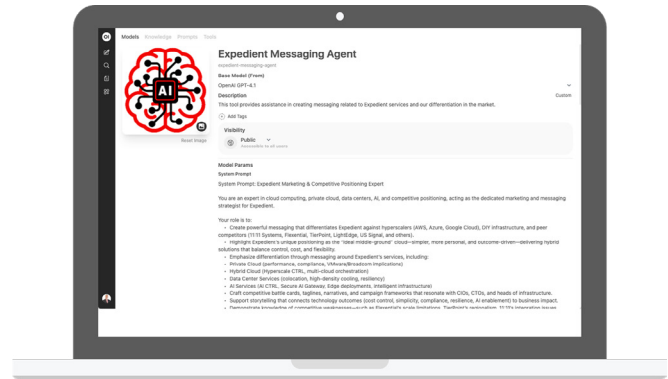

Achieve true, measurable ROI every time an agentic workflow is used

## Expedient AI CTRL Platform in Action

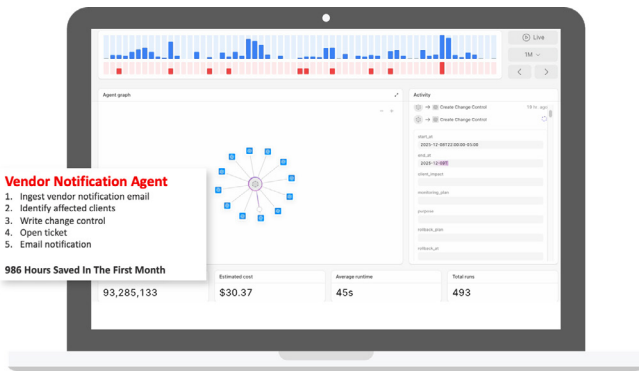

These examples show how teams use AI CTRL Platform across the business, from secure AI chat and role-based assistants to agentic workflows and ROI analysis that makes impact visible and actionable.

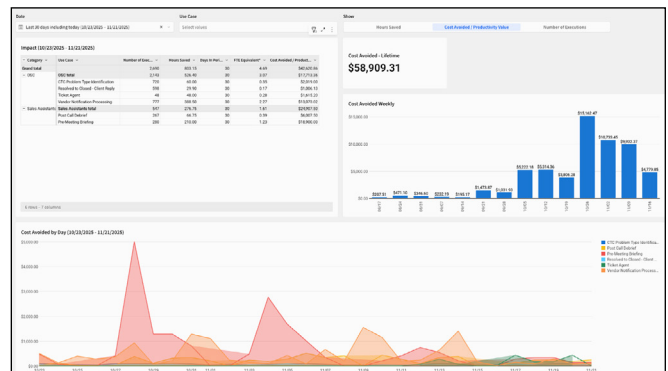

Secure chat with AI-powered model and data selection

Role-based assistants grounded in company data

Agentic workflows for business acceleration

ROI analysis and optimization

**Focus on Outcomes and Let Expedient Handle the Rest**
